

Regional Building Decarbonization Oversight Committee

Meeting date: April 11, 2025

Agenda Item #: 4 (Attachment B)

Building Policy Collaborative Jurisdictional Support Grant Program

Agenda item type: Discussion

Summary

Initial review and discussion of the Jurisdictional Support Program, consisting of \$34.8 million in sub-awards to DRCOG's member governments for staff capacity and resources to help local governments achieve pollution through implementing ambitious high-performance building policy, process improvements and achieving high compliance rates.

Background

The Jurisdictional Support Program is one of the three components of the Building Policy Collaborative and consists of \$34.8 million in sub-awards to DRCOG's member governments for staff capacity and other resources necessary to help local governments adopt and implement building decarbonization policies that will improve building energy efficiency and reduce greenhouse gas emissions. These awards will support local governments with implementation of electric preferred energy codes by 2030, streamlined heat pump permitting, benchmarking policies, and other policies, tracked through the movement of each DRCOG Jurisdiction along a Building Decarbonization Roadmap.

DRCOG will administer sub-awards to member governments through a formula grants program, the Jurisdictional Support Grants. DRCOG staff will provide an overview of the Jurisdictional Support Grants, including eligible grant uses, the grant funding formula, grant requirements, and grant timeline and discuss upcoming steps to operationalize the Jurisdictional Support Program.
