

## **Board Work Session**

Meeting date: May 7, 2025

Agenda Item #: 5

### **Building Policy Collaborative Jurisdictional Support Subaward Program**

Agenda item type: Discussion

#### **Summary**

Review and discuss the proposed Jurisdictional Support Subaward Program, consisting of \$34.8 million in subawards to DRCOG's member governments for staff capacity and resources to help local governments adopt and implement building decarbonization policies.

#### **Background**

The Jurisdictional Support Subaward Program is one of the three components of the Building Policy Collaborative and includes \$34.8 million for subawards to DRCOG's member governments. The subawards are generally available to local agencies for staff capacity and other resources necessary to help local governments adopt and implement building decarbonization policies that will improve building energy efficiency and reduce greenhouse gas emissions. These awards will support local government efforts to implement electric preferred energy codes by 2030, streamline heat pump permitting, benchmark policies, and other policies.

DRCOG will administer subawards to member governments through a formula funding distribution. DRCOG staff will provide an overview of the proposed elements of the Jurisdictional Support Subaward Program, including eligible uses, the funding formula, requirements, and timeline. Staff will also discuss upcoming steps to operationalize the program.

#### **Action by others**
