

## Transportation Advisory Committee

Meeting date: March 23, 2026

Agenda Item #: 9 (Attachment G)

### 2029-2032 Transportation Improvement Program Policy Document Amendment Update

Agenda item type: Informational Briefing

#### Summary

Discussion regarding development for the new Fiscal Year 2029-2032 Transportation Improvement Program, or TIP, and potential amendments to the existing TIP policy document related to active transportation.

#### Background

The next four-year TIP will cover federal Fiscal Years 2029-2032, for which the first step is to amend the existing TIP Policy document. As discussed at the January meeting, staff intend to bring policy elements to subsequent TAC meetings through this year. These discussions are intended to assist and direct staff in drafting an amendment to the document.

#### TIP policy document amendments – active transportation

In regards to active transportation elements of submitted applications, staff are requesting feedback on the potential for new policy elements in three areas:

- New requirement for collecting and submitting activity counts after project completion.
  - In order to assist in quantifying construction project impacts, sponsors will be required to collect and submit 14 day counts at least 4 to 6 months after the project has opened to the public.
- Minimum pedestrian and bicycle facility standards and provisions.
  - To accelerate completion of an accessible sidewalk network and advance new design standards and best practices, project sponsors will be asked to meet minimum criteria for walking and active transportation infrastructure for most project types.
- Addition of walk audits as an application element.
  - A new element will be added to the TIP application process requiring sponsors to complete and submit a simple walk audit within their project area to inventory infrastructure deficiencies and right-of way issues for design and construction projects.

#### Action by others

None.

#### Previous discussion/action
